Software developer with an extensive background in art. Passionate about creating products that are functionally sound and visually appealing. Strong communication and presentation skills with an acute attention to detail.

TECHNICAL PROJECTS

Game-UP | [Github](#)

Web application for video game enthusiasts to get information on any game and stay up to date with recent gaming news

- Built backend API using Ruby on Rails, allowing users to create accounts and personalized lists of video games
- Developed frontend using React JS, utilizing the IGDB API for video game data
- Implemented Google OAuth for individual user verification

Dino Dash | [Github](#)

A single page application featuring an infinitely side-scrolling game inspired by Google Chrome browser's Easter egg "T-Rex Run!"

- Built backend API using Ruby on Rails to save users and their high scores
- Developed in Javascript using the Phaser framework to streamline game development

NBA Stats Tracker | [Github](#)

Command Line Interface application that allows users to track stats of their favorite basketball players

- Developed using Ruby on Rails, saves users and the players that they decide to track
- Utilized the balldontlie API for data on NBA players and teams
- Implemented basic CRUD functionality and user authentication

TECHNICAL SKILLS

Javascript | React | Ruby | Rails | HTML | CSS | SQL | Sinatra | Github
